Centra Mental Health Services provides comprehensive inpatient psychiatric treatment for adults age 18 and older who struggle with daily life because of an emotional crisis or troubling thoughts and behaviors. They may suffer from depression, anxiety, schizophrenia, manic-depressive illness, psychological disorders, personality disorders or other dysfunctions.

Centra Senior Psychiatric Program exists for older adults. Contact Beth Ulrich at 434.200.4444 for more information.

After thorough evaluation, our team of psychiatrists, nurses, clinical social workers, clinical psychologists, occupational and recreational therapists and counselors, develops a treatment plan tailored to the patient. In addition to providing individual treatments, the team meets regularly to evaluate the patient's progress.

Discharge planning begins shortly after admission to assure the patient's smooth transition from hospital to home, family and community. It's all part of our commitment to assure patients of comprehensive, continuous care.

Call 800.947.5442 or 434-200-4444 for additional information about inpatient acute psychiatric programs and community-based programs.
