English

The Quality of Life Foundation closes the gap that exists between resources and needs for families who provide full-time care giving to their wounded warrior at home. The Wounded Veteran Family Care Program is for those families who provide a substantial amount of care for a catastrophically wounded, injured, or ill veteran at home.

The "Community Resource Coordinator Program" provides a locally-based, personal resource coordinator to effectively leverage local, county, state and national resources to develop a system of support and meet emergency needs.

Search on the website for non-profit organizations that support severely wounded warriors and their families.
